Techno

Techno is a furniture collection where uncompromising craftsmanship and rugged elegance converge into architectural design. Laminated solid oak elements create a highly stable, durable structure maintaining integrity over time. The deliberately exposed joinery clearly expresses the build. Rounded edges soften the robust frame, creating a sophisticated balance between strength and refinement. The design principles: strict symmetry, joinery and fully rounded edges change how Studio Beeks designs furniture. Rather than restricting, the material and dimensioning become almost modular like blocks used in different setups for various furniture types.

The collection consists of:

- N° 1.1 - Dining Table
- N° 1.2 - Coffee Table
- N° 1.3 - Lounge Chair
- N° 1.4 - Side Table

The Techno Collection fits perfectly in any interior where a love of craftsmanship and architectural design play an important role. The furniture becomes the natural focal point that anchors a space with confidence and timeless character.

Studio Beeks

Studio Beeks is a Dutch furniture design studio creating high-end collections for architectural interiors. Combining engineering precision with refined craftsmanship, the studio develops durable, expressive pieces that balance material honesty with structural clarity. Its collections are designed for interior architects and private clients seeking timeless, sustainable design.

With Studio Beeks, Coen works independently on his own designs in his workshop.
